<b>25. Reducer 5 Liters</b>	Our Purest Paint Thinners				NA			€47.30

**Substrate Preparation:**

Preparation of surface would be done in the same manner as conventional spray painting. Surface must be free of grease, moisture and dust.  
For surfaces with poor paint adhesion, use our appropriate Base Coats.

These are Special Paints that require Patience. Always apply in thin layers and build up. Never mix products of different brands to prevent incompatibility fading and adhesion issues.
